

# HOT ROCKS

SEAR. SIZZLE. SAVOR.

## *How to cook on lava rock*

Our lava stones are heated to 750 degrees Fahrenheit, allowing you to easily prepare your food to your desired liking. The steak will come out to the table seasoned and cooking on the stone.

Flip the steak and start cutting it into smaller pieces.

**SEAFOOD:** Flip and cook until no longer translucent.

### HOW WELL DONE DO YOU WANT YOUR STEAK?

**RARE:** If you like your steak on the rare side, keep the pieces a little larger so they don't cook too quickly and dry out.

**WELL-DONE:**

If you like your steak more well done, cut the steak into thinner pieces so the heat can get to the middle more efficiently.

### HOW DO I KNOW WHEN IT IS DONE?

Cut a piece of the steak in half to see how red the middle is, if it is done to your liking, you eat! If it's not there yet, keep cooking it!

Once the steak is cooked to your preference, remove it from the rock and place it on a side plate so it doesn't continue to cook.

When you are ready to eat a bite, place it back on the rock to warm it up before eating it, it will be hot like it just came straight out of the kitchen!

# ENTRÉES *on rock*

Choice of two sides: steamed broccoli, steamed baby carrots, orzo parmesan, garlic mashed, potato wedges
